**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-7 and 11-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Paul et al., (US 6,704,863).

As per claims 1-7 and 11-13, Paul teaches an integrated circuit (fig.5) having means for providing access to a processor device (20) , said integrated circuit being arranged to set up a direct memory access (DMA) for transferring data via said access means, to trigger a DMA transfer of said data, to add said DMA transfer to said transaction log, to provide said transaction log to said processor device when said

Art Unit: 2182

transaction log has reached a predetermined depth limit, and to issue an information indicating the availability of said transaction log. Paul teaches an IC having a processor that stores the starting address for the current DMA transfer, as well as the block size used to calculate starting address for the next DMA transfer; it also logs the total number of transfers in a DMA event counter, so the user can be notified when the count reaches a certain value. These three values comprise the block address information required for the processor to interact with the memory controller. (Abstract, cols.3-8)
